# TWIST-EMS

FOR ALL

**C**ALLED the "handiest gadget developed in a generation," Twist-Ems are made fast with a quick twist of the wrist, rather than a knot. Thus, because of the great savings in time possible with their use, they are rapidly replacing cordage of various kinds in operations which require tying.

Manufactured by

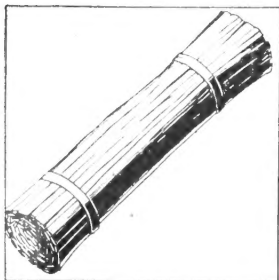

**GERMAIN'S**

GERMACO PRODUCTS DIVISION

# All the Answers About UTILITY TWIST-EMS:

Q. What are Utility Twist-Ems made of?

A. Utility Twist-Ems are printed paper tapes laminated with preservative base asphaltum, and reinforced with high grade, malleable steel wire.

Utility Twist-Ems are easy to carry; a bundle of 250, pictured above, weighs only four to five ounces.

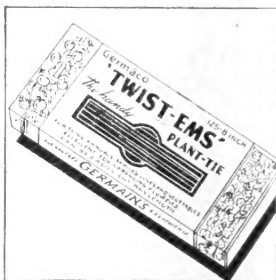

Q. How long and how wide are they?

A. Utility Twist-Ems are  $\frac{1}{4}$ " wide and are cut in 7", 8", 12" and 16" lengths. They are green in color.

Q. How are Utility Twist-Ems packed?

A. Utility Twist-Ems come in convenient bundles of 250 pieces, packed in cartons of 25,000, 12,500 or 10,000 pieces depending on the length.

Home gardeners of America are again tidying up their garden tying jobs with the 8" packaged Twist-Em. A war casualty, this type of Twist-Em is now available in the same handy package in which it made its initial appearance seven years ago.

Germaco Package Twist-Ems.  
125 Twist-Ems in a handy dispenser type box.
